**CONGRATS !**  
On your new job

Congratulations to Jainil Shah (adm batch 2011, Mechanical Engineering for starting new position as Analyst at Deloitte Consulting

Congratulations to Ronak Prajapati (adm batch 2013, Chemical Engineering for starting new position as Production Engineer at GFL, Dahej

# the Journey

Empathy. Education. Experience. That's what enables us to find our pathway through this challenging world. And SRICT proves to be one of such institutes that provides a platform for each of these. College life plays a significant role in every individual's life, it tends to diversify our mind, and provides us with a broader platform to understand and prove ourselves. It's a place where we build a bigger foundation of our life, and we discover and evolve ourselves. The need to be more responsible automatically comes in the way too.

Our college has been one such factor for me as well. It assisted me with my overall personal development, be it encouragement for studying, enlightening technicalities, or exploring recreation grounds. Additionally, I caught sight of some great teachers and friends for a lifetime. Having said that, friendship made in college is an important part of one's own decision. As I see it, they last longer, are much deeper, and naturally, teach us to be diplomatic too; which in the end plays a crucial role in one's growth.

Overall, my college experience has been a fantastic voyage with an abundance of knowledge (theoretical as well as pragmatic), attaining self-belief, rewarding experience, competence development, a bunch of connections (professional and personal), and tons of memories to cling to. Therefore, college life has been a very memorable part of my life, may however it be, but it is close to the heart. And may I say that if we can be self-conscious, we can do both hard work and fun at a balance and make most of it. Because at the end fun and sincerity should always be well-balanced.

Best wishes

**JESAL PATEL** (Adm batch 2014, EST)

# the Journey

Hi, I am **Ronak Prajapati**, alumni from Chemical Engineering, admission batch 2013. I was placed at Sun Pharma, Panoli plant. I had a good learning experience in a pharmaceutical company. I shifted to Meghmani, Dahej, and recently I have joined GFL, Dahej as a Production engineer. In this short span of five years of my experience in the chemical process industries, I personally feel that we should keep learning new things even from our everyday routine. I am working on multiple projects. I encounter challenging tasks and try to work on them.

For fresh engineers, I would recommend keeping their fundamentals clear, with basics of distillation and other operations including process safety and permit to work. I also insist fresh engineers to work in the production area at least for two to three years and later, switch into processes or projects. During the initial phase of your career, particularly in production, you would face a lot of troubleshooting problems that become lifelong learning. Today, I feel comfortable working on projects due to my learning and experience of production.

I keep meeting alumni of our college in organizations, I have worked. And it feels good to know that your subordinates come from the same academic institute. I look forward to staying in touch.

**RONAK PRAJAPARI**  
Chemical Engineering  
Adm. batch 2013

# the Journey

My name is Ravirajsinh Solanki. I completed my B.E electrical engineering from SRICT 2019 and currently working at PowerGrid corporation of India limited, Daman. I'm here to share my views that how SRICT help me to shape my career. SRICT prepare me to face challenges in my career. Main moto of this institute is to make dreams into reality.

In SRICT one-to-one meeting is organized with vice-chairman Mr. Ashok Panjwani sir, in which sir personally talks with the students and encourages them about their destiny. SRICT also arranged industrial visits, Expert lectures, co-curricular activities. So students can get more practical knowledge of their respective fields. To boost up your confidence. SRICT provides peer learning initiatives. SRICT also offers cash rewards to motivate students to do hard work.

Then SRICT also organized National level techfest, Revafest (our annual function), sports day, etc. Thus it's such a great platform to build up a great engineering future. Then coming to the heart of the SRICT family that is Faculties. As per my own experience that I have seen during my 4-year journey. Faculties are very much flexible and are always supportive of us. They were extremely friendly with us and they always insist on making PPTs, sending soft material & assignments.

Last but not the least, I would like to conclude that SRICT(now UPL University of sustainable technology) is a place which is a combination of ideas, entertainment, motivation & many more things. not only limited to education.

Thank You.

**RAVIRAJSINH SOLANKI**

# the Journey

Hello,

I am **Valay Patel** from Chemical Technology (Rubber & Polymer Technology) admission batch 2016. I am working in BEIL Infrastructure Ltd., Dahej as a Production Officer from the past 1 year.

SRICT has taught us discipline and punctuality which is helping in my career as well as in my personal life. SRICT trained me to execute any activity assigned to me with full confidence and faith in myself as well as my knowledge which was given to me in 04 years of education.

Thank you.

# STARTUP & NEW VENTURES

Congratulations and Best wishes  
To  
Kandarp Teraiya  
for the new venture

Congratulations and Best wishes  
To  
Tirth Vachhani  
for the new venture

**DAHEJ FARM SOLUTIONS PVT. LTD.**

Factory Address : Plot No. D-2/CH/355, Near Unitop Chemicals,  
Toyo Cross Road, GIDC - 2, Dahej, Dist. Bharuch, Gujarat-INDIA.

# WHAT'S HAPPENING

## ON CAMPUS

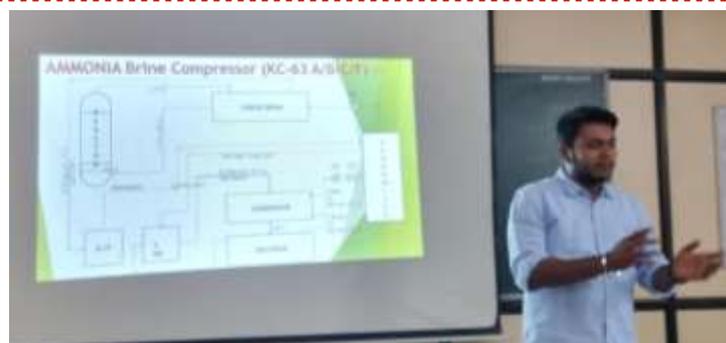

For such happening campus; SRICT, its difficult to cover all the activities. We showcase the glimpse of few recent activities.

The Center of Excellence (CoE) in Process Safety, UPL University of Sustainable Technology, feels happy to share the course on "fire and safety". We offer training programs with customized learning modules as per the requirement. The program covers lectures from experts in the field from academics as well as industries, site visits, software animations, film shows and other interesting activities. Join the professional in-demand course and enhance your career.

Happy to share that Gujarat Pollution Control Board (GPCB) has approved our Environmental Science & Technology (EST) students, equivalent to Environment Engineers as Audit Team Member under Environment Audit Scheme of Gujarat Pollution Control Board. We are thankful for the approval.

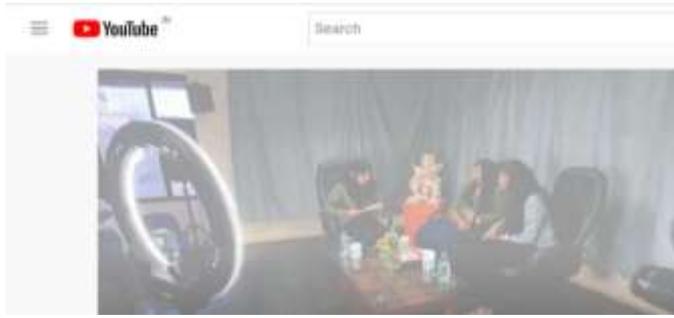

All the departments organized the In-plant Training Review-I presentation for 8th-semester students
