FROM ENGINEER TO BUSINESS ANALYST

Hi everyone,

I am Chetna Verma from Chemical Engineering, 2017 admission batch. I was placed with BechtoChem and I worked there for almost ten months. While I served there for a short tenure, I learned a lot of things. Infact, I could figure out my area of interest and I understood my forte. Recently, I joined Evalueserve at Gurgaon as a Business Analyst.

While dealing with clients and understanding the business during my first job, I understood the area, roles, and responsibilities where I can excel in my career. I personally feel that internships are very important while pursuing a bachelor's. I would suggest to all the students of our university to work hard during their internship and also, to work hard on soft skills. We need to have a broad spectrum with regards to our careers while we enjoy our studies during our college life. Also, think of the long term and take a decision. Many times, after working or surveying the market, you may realize what suits you and where you can significantly contribute. Though, the basics remain the same no matter where ever you serve. Looking forward to staying connected to my alma mater.

Cheta Verma

Business Analyst, Evalueserve, Gurgaon

REMINISCENCE

It's really a pleasure to write about the place which has been defining part of my life. Trying to remember the wonderful times and people I came across at Shroff SR Rotary Institute of Chemical Technology (SRICT), I feel good and realizing how far I have come ahead in life, I cannot be less grateful to this institute which had a positive impact on my career.

As the quote goes -

"The quality of university is measured more by the kind of student it turns out than the kind it takes in." - Robert J. Kibbee.

This is very much evident in my case when after graduating from this institute I was a better person, not only to make a good career but also a person with a strong character. The friends I made, the peer group I had, the faculties who taught me and all the people I met in my four years, reminiscing about all of it, I feel glad that I was able to come across such wonderful people in my lifetime.

From an academic point of view, I believe we got the best of facilities and quite industrious faculties of the contemporary times. This was more so because of the vision rooted in the ethos of the institute, set by the management of giving the quality education which not only meant a singular dimensional delivery but a multi-pronged approach of practical learning and ethical perspective. The importance of the latter I only understood when I had started working in my career. I learnt that an ethical mindset can actually complement my academic learnings with the loudest impact and SRICT was the platform where I was able to gain this. I vividly remember the peer learning initiative which had begun in 2014 and the role it played to develop myself in a very holistic manner. I am also grateful for all the leadership avenues I got to be part of during my tenure which helped me immensely to contribute towards betterment of people around us and help everyone to have a shared future full of opportunities.

The extra-curricular activities were really one of a kind at SRICT and I am happy to tell you that some of the amazing times and fun I had with my friends was here. The networking opportunities in the form of extra-curricular and co-curricular initiatives like expert lectures and industrial visits helped me and batchmates to connect with people who proved to be of great importance to get a headstart in our respective careers.

Four years are filled with so much more, wonderful experiences and failures, adversities and good times, that a single article cannot do justice. But one thing which I am glad about is that looking back on this nostalgia, I feel ever so grateful to everyone who was part of this specific journey of mine in this institute. I believe the institute in its new avatar UPL University of Sustainable Technology is well poised to provide great careers to all the students' currently studying here. I want to convey my gratitude to all the people from my time who are still a part of this organization and also wish all the best to everyone for their contribution towards a better shared future.

- Rhishabh Jadhav

B.E. Mechanical Engineering

Batch 2013-17

Alumni Connect

Kishan Patel

I passed out in the year of 2017 with the B.E. in Chemical Technology with specialization in Glass & Ceramic Technology.

I worked with Arta Broch Ceramics Baroda and also in Neutral Glass, Kosamba.

Presently, I am working with Borosil Renewables Ltd.

Hiii

I am Palak Anil Pawar alumni student of SRICT completed Bachelor's of Engineering from Electrical department in 2020 and now working with BEIL Infrastructure Ltd Ankleshwar

Finding the right path to success at the right time is really very important and for that way I had selected SRICT.

The environment, the systematic approach towards imparting education at SRICT made me a competent individual. The wide range of activities- both curricular and co-curricular along and the support and motivation from college is really very helpful for my future. The faculties are really very kind and approachable when any need arises. SRICT not only supported me in my studies but also it supported for my music passion. They give me platform through Reva Fest and Cultural Fest Because of there belief on me, Twice I got zonal level vocal trophy in Culture fest of Gujarat

If I compare the first day and last day of collage I found myself more confident and positively change person.

Thanks

STEPPING STONES FOR LIFE

I feel nostalgic while writing about my journey of 4 years at S.R. Shroff Rotary Institute of Chemical Technology. Life was like a roller coaster; full of twists and turns, ups and downs, and full of surprises. But when life's journey is smooth, life is beautiful. My college life was just as exciting, where I experienced ups and downs like being on a roller coaster ride. There were exciting moments along with stressful, anxious, nervous, frightening, and victorious moments. The college years were genuinely surprising and a wonderful point in life where I took mature steps towards my future, meeting many friends, choosing my majors, finalising careers, and preparing for the challenges of the real world.

I am Dishant Khatri a former student of Environmental Science and Technology department. I am currently working with an organization which promote improvement of the environment in the Mumbai Metropolitan Region (MMR) through studies, surveys, demonstrations, investigations, research and related activities as an Environment Planner.

Journey at SRICT was all filled with emotions, I longingly look back at those four years gone by. I have gone through a lot of bumps during the first few semesters, but I've also enjoyed the ride in between. This has been an amazing ride, no matter the struggles I have faced. Many a time, I hear people complain about college life, saying that they could have done much more, but in my case, it is the best experience one could have had. I still remember the first day of college, wandering hither and thither, surrounded by strangers. I felt I was Alice in Wonderland; so much to see, so much to explore, full of fears, and unsure of the future.

When coming to interesting part apart from our daily lessons, we had several initiative-like industrial visits, PLI (Peer learning Initiative), academic excellence awards which were organized frequently to make us learn in a better way. Our college was so much inclined towards such concepts as they thought only classroom knowledge is not appropriate to make a person market ready. Industrial visits which, we enjoyed a lot, where we not only had good time outside our class but also had great learning experience onsite.

Overall, the journey of 4 years was fantastic for me where I had several takeaways, from knowledge, excelling in sports, discipline, punctuality among few. College life was not easy as I thought. I had to be fully prepared to accept the challenges and tough situations thrown my way. These experiences have taught me how to lose gracefully, and also enjoying winning

WHAT IS GOING ON AT UPL UNIVERSITY

UPL University of Sustainable Technology organized the 1st Annual Cultural Festival "REVA FEST 2022" on 18th April 2022. The theme of the festival was "Sanskriti Karyarth". Over 500 Students took part in the festival, directly and indirectly. The cultural program presented various forms of dance, music, theatre and exhibition representing diversity of culture. The program was graced by eminent personalities including, Shri Kanubhai Desai, Honorable Minister of Finance, Energy and Petrochemicals - Government of Gujarat, Shri Rajendra Gandhi, Managing Director - GRP Ltd., Mrs. Sandra Shroff, Honorable Chancellor of UPL University. All the audience experienced a wonderful day in the program.

On the occasion of "REVA FEST 2022" our Alumni Mr. Jayendrasinh Bodana and Ms. Palak Pawar gave a wonderful performance on stage giving tribute to legendary singer late Lata Mangeshkar and Late Buppy Larry. Showcasing their great contribution to Indian as well as World Music Industry.

WHAT IS GOING ON AT UPL UNIVERSITY

EST Department and IEI students jointly organized an expert lecture for B.E semester 6 on topic "Process Safety". The session was delivered by Mr. Manoj Kamaliya (Voce President, GFL, Ankleshwar)

Orientation program on "Universal Human Values" was organized at campus. Mr. Dilip Udas, Director of Ultra Conserve India Pvt. Ltd. delivered an exhaustive and elucidate lecture on Universal Human Values to all the faculty members.

The T&P cell of UPL University of Sustainable Technology organized an expert lecture on "How to Prepare for an Interview" for B.E. 6th Semester Students. The lecture was delivered by Mr. Akhil Karkhanis, Alumni and Process Head, ETL.

A felicitation program "ABHYUTTHAN" was organized to felicitate B.E. 2019 Batch and M.E. 2020 Batch for their GTU results of Winter-2021. The program was organized by Mechanical Engineering Department at UPL Hostel.
