ALUMNI CONNECT

"This is the college that accepts raw stones, polishes them for years, and gives them to society as precious diamonds." A visionary institute with outstanding support from faculties and management support from UPL & Rotary club who are heartily dedicated towards sustainable growth of students, environment, and society.

I am blessed to get the benefits of the number of industrial visits and expert lectures to link theoretical knowledge with practical, the 5S concept, a Rich source of a library, and a platform to show talent on IICHE, Technical Fest. Industrial internship and 100% placement opportunity. This college is not just providing an opportunity to make your career but an opportunity to make your life and future. At present, I am working as an Assistant Manager - Process in Aarti Industries at the Dahej unit. I feel happy sharing that the core values and the knowledge that I have gained during those four years of my stay at SRICT have made my industrial journey easy. I look forward to staying connected to my parent institute, my batchmate, the chemical engineering department, and the present students through the alumni association.

Sanket. S. Yadav

(Chemical Engineering admission batch 2012)

Every human develops the foundation of oneself during his or her school and college life. All we learn helps us throughout our lives personally as well as professionally.

Here I am Mr. Vasu Dixit from Mechanical Engineering Alumni batch 2013-2017. I have been working with Gujarat Guardian Limited from last 5 years as Technical Services Head - Gujarat & Madhya Pradesh. I feel so delighted to write about those four years of my life that has taught me a lot, not just academically or in curriculum but also to grow as a good human.

It was all a big new experience when I started this new place, new people, new faculties but I myself could not mark the day when did that all become a family to me. It has been a great experience to be a part of SRICT family. I will not say everyday was a great day out there, but I can definitely say that every day taught me something or the other. Exploring new things, learning from own mistakes, choosing between the correct and the incorrect and many more like these are the things we learnt over those four years with experience. The four years I spent here helped me develop many skills with help of qualified, practical and supportive facilities. The kind of discipline taught in SRICT always helped me to stay disciplined in my professional life also. During our college life it was always a compulsion to maintain deadlines in all our projects and assignments which really helped me to maintain the deadlines in all my professional tasks which helped me grow better in my company. The kind of exposure given to us with the help of regular Industrial visits and fully equipped in house labs and workshop has help me understand practically about what we studied in our classrooms.

Most importantly there have been frequent cultural, technical and sports events where I have been a core-committee member consistently for the four years of my college life which really helped me a lot to enhance my management skills. There is lot I can write about my SRICT journey as a lot of sentiments are attached to it, but yes before concluding I want to convey my gratitude to each and everybody who was directly or indirectly involved in my SRICT journey and has helped my come out and one of the best versions of mine.

Vasu Dixit

2013-2017

ALUMNI CONNECT

One of the most interesting stages in life that gives you an opportunity to explore is 'college Life.' Life at college is the time when the teenage years end and we all dive deep into the ocean of new beginnings and possibilities. This golden period better equips you for all the challenges you'll face in life and creates a strong foundation of knowledge.

Hello everyone. I, Nidhi Patel a former student of Environmental Science and Technology department. I am currently working with an organization namely Ecopreneur incorporate. My experience at SRICT has taught me one fundamental thing - life is unpredictable. It might be good, it might be bad, it might be weird, and it might not interest you, but expect anything to happen. We have seen SRICT from 2 phase building to a fully fledge successful university. And I feel so proud that I am a part of SRICT.

People might try to motivate you by saying that you need to study only through your school years and chill during college life, but that isn't true. SRICT taught the important lesson of life that learning never ends. In every nook and corner of the college, you'd find a peaceful spot full of natural surroundings, whose value you will only realize once you graduate from your campus.

ALUMNI CONNECT

Even when I had gone for my Post graduation in Environment engineering, I never experienced this kind of motivation and support from faculty and seniors. SRICT has great faculty and supporting staff who always prepared us to always give our best in life.

Some unique concepts like the presentation in every subject to overcome the stage fear, Mock interview round to prepare students for their actual interviews, scholarship opportunities to appreciate students for their academics and fully equipped laboratories to gain practical knowledge. Also, SRICT always believes that students should actively participate in extra circular activities except technical knowledge.

I always cherish my unforgettable memories at SRICT. Even today, whenever I went to college for any work I went down to memory lane. I would like to heartily thank SRICT for shaping us into future professionals. I have personally felt that their belief, confidence, and opportunities help us even today. I am truly grateful and honoured to be an alumnus of SRICT which made my college life a perfect blend of joy and hardships.

Congratulations Jenish Barot, Alumni from Chemical Engineering, Batch 2014 for starting a new job at Reliance Industries Ltd.

Punit Patel from Chemical Technology-2016 Admission batch has started a new position at ATOTECH DEVELOPMENT CENTER, Manesa Haryana as an intern in Research and Development (RMQ) department.

Congratulations to Punit Patel for his great Achievement.

WHAT'S HAPPENING ON CAMPUS

Department of Chemical Engineering, SRICT, organized an industrial visit for 4th semester students at Heubach Colour Pvt. Ltd. on 24-05-2022. Students were initially made aware about safety protocol in the company. Then they were led to a plant round where they got to see the chemical tank farm, warehouses, pigment area, aeration area.

An Inter House Quiz and water hunt Competition was organized by the chemical engineering department, SRICT under the theme of Azadi ka Amrit Mahotsav and IChE Students chapter for 1st year BE and Diploma students. It was three stage competition which covered the areas of Science, Maths, Social Science and General Knowledge.

Department of Mechanical Engineering organized a hands-on workshop on "Autocad and Solidworks Simulation" for mechanical engineering students. Students acquired basic knowledge about the Autocad and Solidworks Software. They had an opportunity to gain practical information by hands-on practice.

UPL University of Sustainable Technology had organized an expert lecture on "Manage your time and set your goals" which was delivered by PDG Dr. Nilax Mufti on 7th May 2022. Students were taught the importance of setting achievable goals and managing time for the same.
