# Alumni Talk

At the very outset, I would like to express my heartiest thanks to the SRICT family. I extend my warm regards to my department, the Department of Electrical Engineering which has immensely helped me succeed.

**JIGAR MEHTA**  
Electrical Engg.  
Alumni from adm.  
Batch 2013

I am highly indebted to the entire SRICT family, in particular, Department of Electrical Engineering for helping me achieve great heights in those three years. It was a wonderful experience at SRICT with an excellent exposure provided across the various platforms. The faculty are very supportive and encourage students to push boundaries to rise above expectations. SRICT targets for an overall development of every student, be it education, cultural awareness or practical exposure of world like industrial exposure.

**SRICT has helped me realize my dreams and achieve my goals. I am proud to be a part SRICT !**

## Forever be grateful

As they say school and college are the temple of learning and I strongly believe that SRICT has been my temple of learning, which has given me correct path for my future endeavor. I have joined SRICT in 2015 batch as a student of Environmental Science and Technology.

Drashti Ghodasara,  
EST- Alumni from  
adm. Batch 2015

I received immense support and encouragement from the faculty in difficult subjects. There was thorough guidance in every initiative be it projects, research, or lab work. Most notably, the environment created by the college from both the faculty and the students was conducive to my all-round development. I would always be grateful to SRICT for giving me multi-dimensional learning by providing the knowledge of Academics, Industry, and leadership.

The college has lots of opportunities for students to expand not only their technical acumen, but more importantly, develop approaches for problem solving, and analysis, which aids in career growth. The College provides really good placement opportunities combined with many internship programs, seminars by expertise, expert lectures by industrialist and other placement programs, and because of hard work of our Training and Placement cell. I got a placement in BEL. I am blessed to be part of SRICT as how it has changed my life in every aspect. Wherever I am right now is just because of the guidance of professors and I will never forget their lesson in my life ever. Apart from that, how can I forget those special canteen movements with my friends. I found them all as part of memories which I will cherish always. I would like to say special thanks to all the faculties, friends and SRICT management for giving me the best 4 years of my life.

# Alumni Talk

I have spent the golden days of my life at SRICT. I feel extremely proud to call myself as a SRICTian where my career was moulded. The efforts of faculties and management in enhancing students skills, abilities and interests are really appraisable. That four years of my life was full of happiness, learning and opportunities. I believe that SRICT inculcates self-discipline and leadership qualities among us to prepare successful entrepreneurs.

Srushti Patel,  
CT- Alumni from  
adm. Batch 2015

Thanks and regards,

Srushti Patel,

Dipen Organics Pvt. Ltd.

# Alumni Experience sharing

I am Meet Shah from Mechanical engineering alumni 2019-2022. I feel so delighted to write about my journey with SRICT.

As we know that life is unpredictable we can not expect anything as Covid hits and disturb whole ecosystem of all sectors including Manufacturing, Education, Health etc..

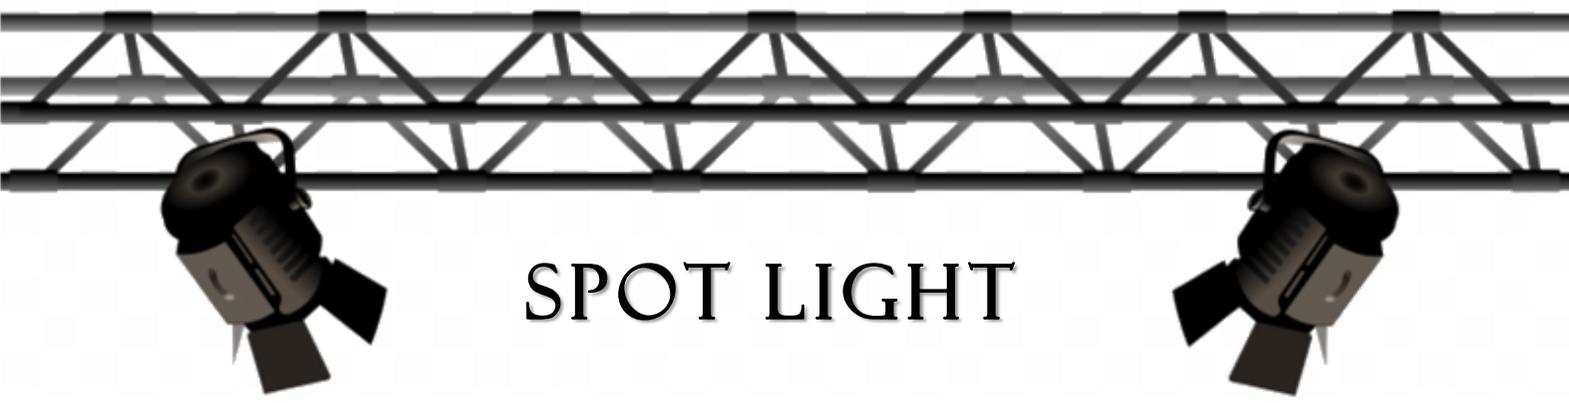

Meet Shah  
Mechanical Engg. Alumni

We all have to adapt the changes as we know that whole education was transformed from physical to virtual. During this crisis SRICT have taken necessary steps to fulfill the gaps and flaws of virtual teaching by conducting online lectures, labs as well as industrial visits. And during this covid crisis faculty are personally trying to motivate us and they are also helping us in many ways like they are conducting vaccination drive as well as providing access to their hospital if anyone has emergency for Covid infection. During our placement they have organize mock interviews which help us in many ways and help us to identify our weakness and our mistakes.

I am so much thankful to Faculty of Mechanical engineering as well as General department for helping me in studies as well as in other activities also during these 3years of journey.

I am personally feeling so much excited to see whole new Environment of UPL University of Sustainable Technology and I am very fortunate to be a part of this. New opportunities will be unlocking in future which will bring many good and knowledgeable experience to students! As the branches will be more diversified, the more recruiters will come to recruit students which is really good point according to me and this will benefit the students. I hope that the ecosystem, which will be created in University, will enhance whole education system as well as it will be focused on co-curricular activities which in turn help students to enhance and uplift their personality and their creative thinking.

# SPOT LIGHT

**CONGRATS !**

On your new job

Congratulation to **Aadil Patel**  
(Alumni from Chemical Engineering,  
Admision batch 2014) for starting a  
new position as DCS operator at  
Camlin Fine Science!

## FRESH START..

I am even grateful that I am getting the chance to work with the prestigious organization UPL Ltd because of SRICT. It's been 2 weeks since I joined the organization, and I can proudly say that, if you are willing to contribute to the organization or society as a whole, this place is the best.

I am working with the best of mentors, teams and colleagues, and even looking forward that some of you may join in along! One of the best things I found is that here you get a chance to make your own goal and everyone contributes their part towards the same.

To sum up SRICT is the place that I found myself indeed lucky to be a part of, and also for transforming me into a better individual and to UPL I can say I have whatever I have learned I will contribute my best for the best!

- **Sakshee Jain** (Alumni from Chemical Engineering, Admision batch 2018)

# WHAT'S HAPPENING

## ON CAMPUS

For such happening campus; SRICT, its difficult to cover all the activities. We showcase the glimpse of few recent activities.

As a regular practice, a felicitation program, ABHYUTTHAN, was organized to felicitate First and Second year students for their excellent results of Semester-1 and 3, respectively.

Offline Industrial visits continues.. Students visit at least three industries per semester..

YOGA day celebration at UPL University of sustainable Technology

Dr. Pratibha Gautam presented her research work at 09<sup>th</sup> International conference on Sustainable Solid Waste Management

MoU signed b'ween VND Plastico Pumps and UPL University

- 16<sup>th</sup> July: Celebrating Foundation day
- Monsoon festival: Tree Plantation in collaboration with Rotaract Club
- Get Together..

## FROM THE DESK OF EDITORS

**Hello Readers!**

**Feeling so proud that we are a part of the well renowned university which consistently supports and motivates and help the students in accomplishing the aim and rise beyond the boundaries!**

**It is our appeal to all to read, enjoy, share & convey their suggestions to [setu@sriect.in](mailto:setu@sriect.in). We would be happy to hear from you.**
