“Black Colour is sentimentally bad but every Black Board makes the Students life better”

-Dr. APJ Abdul Kalam

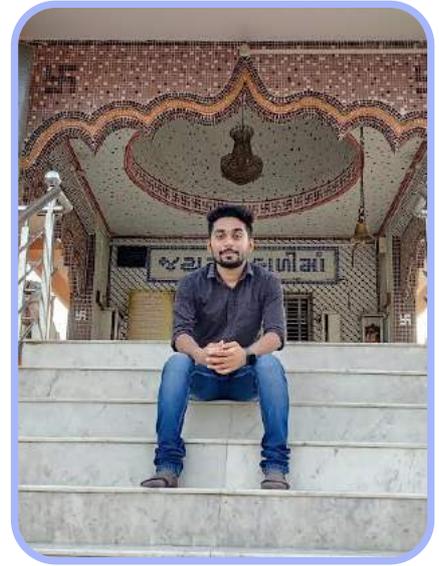

This is my 4 years of journey at Shroff S. R. Rotary Institute of Chemical Technology. Starting my college journey was a little scary for me, so many questions crossed my mind. Was I ready? Did I know where I was going? Was I prepared? So many things. I thought the transition process might be awful. But then, the first day arrived and it was a huge success. After my first day I knew that my college journey was going to be fun and I was fully prepared for what my future held. It was the beginning of a roller coaster ride. College is the time when you meet new people and explore new things. It is time when you fully transform into an adult.

In these four years of my college, I have come across lots of struggle, be it with my grades or adjusting with the environment and new friends. There were times when I faced situations like submitting assignments, making PowerPoint presentations, presenting seminar papers and stress of Semester Exams but with the passage of time, I learned to find the silver lining and then everything began to get interesting, Spending time with friends, enjoying the canteen food, working together with friends as team and winning it. I find myself fortunate to have brilliantly inspiring faculties and staff, supportive seniors and amazing classmates. Besides all of these, SRICT is very constructive about the Industrials Visits, PLI (Peer Learning initiative), Academics Excellence Awards, Cultural and Technical Fest. SRICT not only believes in theoretical knowledge but also pragmatic. It offered me the opportunity to change myself in a generous way with self-confidence, discipline and knowledge. It has inspired all of us to work hard enough to excel in our own area of interest.

Overall the journey of 4 years was out of the box experience for me. To wake up every day knowing that I get to do what I love was worth the long journey. I am honoured to be an alumna of such an institute where we were taught to inculcate enough courage to face the real world.

ALUMNI LETTERS

Hello Everyone

My name is Gohil Siddhrajsinh Jayendrasinh. I completed my B.E electrical engineering from SRICT

2022 and currently working at Ambetronics Engineers PVT.LTD, Bharuch.

I'm here to share my views that how SRICT help me to shape my career. SRICT prepare me to face challenges in my career. Main moto of this institute is to make dreams into reality.

In SRICT one-to-one meeting is organized with vice chairman Mr. Ashok Panjwani sir, in which sir personally talks with the students and encourage them about their destiny. SRICT also arranged industrial visit, Expert lecture, co- curricular activities. So students can get more practical knowledge of their respective fields. To boost up your confidence. SRICT provide peer learning initiative. SRICT also offers cash rewards to motivate students hard work.

Then SRICT also organised National level techfest, Revafest (our annual function) sport day etc. Thus it's such a great platform to build up great engineering future.

Then coming to the heart of SRICT family that is Faculties. As per my own experience that I have seen during my 3 year journey. Faculties are very much flexible and are always supportive to us. They were extremely friendly with us and they always insist in making PPTs, sending soft material & assignments.

Last but not the least, i would like go conclude that SRICT (now UPL University of sustainable technology) is a place which is a combination of ideas, entertainment motivation & many more things. Not only limited to education.

Thank You

Gohil Siddhrajsinh Jayendrasinh

ALUMNI LETTERS

Hello, I am Keval Vyas. I completed my Bachelor of engineering from SRICT, chemical technology branch with specialization in dyes and pigment in 2019. Here I would like to share some my interesting journey of college life and got some good experiences.

I learned so many things in my college phase. Like – build my self-confidence, good communication skill, self-discipline, leadership quality, which is necessary for success in one's life. Other than studies I also enjoyed other curricular activities like tech fest, Reva fest, sports day. These four years like my joining 2013 to ending 2019 were unforgettable and unbelievable. This is the place that I knew and build myself. I really miss those days and memories. I genuinely thanks to all my faculties, management and friends to make those four years the best.

JOURNEY

Hi Friends,

It is my pleasure to connect with all alumni, faculty members, and stakeholders of our University through this bulletin newsletter.

I completed my Chemical Engineering in 2019 and started working on new start-ups. I experienced ups and down in the beginning. The learning of initial one year made me realize that its not going to be an easy ride. Every failure is learning. I started collaborating with friends working on their start-ups and the networking played an important role in taking my business to a next level. I started an enterprise (SHRADDHA ENTERPRISE) that included trading of printing inks, solvents and all kind of industrial chemical imports and export. All that I understand in these three years is to keep trying. Perseverance and hard work are the only key. I do miss college days. I am in touch with mates and faculty members. I look forward to staying in touch with my alma mater.

ALUMNI TALKS - JOURNEY

DEBATE - PRODUCTION VS PROCESS ENGINEERING

03-09-2022

02:30 PM to 05:00 PM

Venue: Seminar Hall-1, UPL University

WHAT'S HAPPENING ON CAMPUS

On completion of 75 years of independence (Azadi ka amrit mahotsav), Department of Environmental Science & Technology organized the 76th Independence Day Celebrations at UPL University of Sustainable Technology campus. Flag hoisting was done at the hands of the Chief guest: Rtn. Arpan Surti (President Rotary club of Ankleshwar)

The SSIP cell of our University is organized a seminar on "Building the NextGen Entrepreneurs" on 24th August 2022. Students, Parents, Mentors and Entrepreneurs were invited to the seminar to discuss the opportunities and challenges for NextGen Entrepreneurship. It was very interactive session.

Faculty and staff members of UPL University of Sustainable Technology along with students participated in the event of national drive "har ghar tiranga", a campaign-as a part of Azadi ka Amrut Mahotsav (AKAM) in the honour of the national tricolour.

Under Graduate program in Chemical Engineering is re-accredited for three years w.e.f. 2022-23 by National Board of Accreditation (NBA). The NBA promotes the international quality standards for technical education in India.

Living

MAKING MEMORIES

Alumni's From Mechanical Engineering visited college campus during NBA team Visit. All of them felt nostalgic to see the classrooms and halls they had spent hours in. They were also pleased to meet their Faculties who taught them during their college days. Overall all of them were very pleased to visit college campus again.

From The Desk of Editors

UPL University Invites all Alumni Students to Visit College Hostel for Lord Ganesha's Blessing and celebrate Ganesh Chaturthi Together

We thank our alumni members for providing interesting contents for the Newsletter. We extend thanks to co-editors and reviewers for helping us draft the newsletter. We request readers to kindly write back to us with more ideas, suggestions and feedback. We invite more articles from our esteemed alumni for the following sections/columns for the next issue of monthly newsletter: achievements, stories, new ventures, experience sharing, door darshan, etc. Send your article before 25th of every month on setu@sriect.in

STAY HEALTHY & STAY SAFE.

HAPPY READING AND DO WRITE US BACK.
