Alumni Letters

Prachi Patel

Hello everyone!

I am Prachi Patel Alumni of SRICT(Batch 2019-2023) from Environmental science and Technology.After completion of my 7th sem I was placed from college placement in BEIL Infrastructure limited.Currently I am working as a process engineer in BEIL ankleshwar.

When I took admission in SRICT in june 2019,I was really afraid as all the people were new to me. But soon I started enjoying my college life and made some fantastic friends. It had a lots of ups and down but ofcourse faculties are very supportive.One of the best things about my college is that you get a new experience eveyday. I learned things that I never done before and never thought I would. I personally feel that internships are very important while pursuing a bachelor's. I would suggest to all the students of our university to work hard during their internship and also, to work hard on soft skills.

we remember walking through the corridor with a cheerful smile, motivational lectures & presentations, exposing and exploring that informative world, team-building spirit, and working in a team to achieve our goals with classmates and many more ever charitable memories. But good time flies fast. we all are engineers now and all those days are now past, wonderful memories.

I look forward to staying connected to UPL University.

Thank you!

Alumni Letters

Mihir Rana

I am Mihir Rana, student of 2019 batch alumni of SRICT. I did bachelor in Mechanical Engineering at SRICT from 2019-2023. I am placed in UPL during campus interview. I am recently working in UPL as a Graduate Engineer Trainee.

I had taken internship at UPL from June-July-2022 as a part of GTU 1 month internship. I have also work at UPL as project intern for 3 months.

As far as my skills are concerned, I am learning & developing skills like Analysis of utility system, Mechanical maintenance, Plant Maintenance and Plant operations.
I am really thankful to all faculties, staffs & off-course to my dear classmates for their direct or indirect support to start my career with this prestigious organization.

Alumni Journey

Shivani Modi

It is said "DISCIPLINE IS the BRIDGE BETWEEN YOUR GOALS AND ACCOMPLISHMENT", Well learned from SRICT and now practicing it in my professional life. Being a student of SRICT, I am very glad to share my journey of pursuing Chemical Engineering and in 2019 I got placed in BEIL and had a very great exposure to industrial life for one year. The college teaches you consistency and persistence, which helped me a lot while appearing in competitive exams like GPSC, and UPSC. Currently, I am grateful to this college for giving me a brilliant breakthrough as a Lecturer at UPL University itself. I feel very happy to serve the institute that I graduated from. Our institute, (now University) is surely changing and growing very fast. I request our alumni friends to visit the campus and you will surely feel very happy to the progressive environment in all vertical. The faculties and the atmosphere are so motivating that will help you develop such soft and hard skills which will be so helpful to excel in every sphere of our life.

Alumni Journey

Dhruvil Patel

I am Dhruvil Babubhai Patel, a proud alumnus of Shroff S R Rotary Institute of Chemical Technology (SRICT), 2019 Batch. With immense gratitude, I wish to express my heartfelt thanks to the institute, its faculty, and the management for transforming my life and making my dream of becoming an electrical engineer a reality.

Despite financial challenges, I was fortunate to receive the "Transform a Life" scholarship from UPL University of Sustainable Technology, which enabled me to pursue my passion. SRICT's exceptional studies, placements, and vibrant culture provided me with a holistic learning experience. Through inter-college programs, industry exposure, and mentorship opportunities, I was well-prepared for my professional journey.

I am now happily employed at Saint Gobain India, and I credit SRICT for my success. It is an honor to be associated with this esteemed institution, and I am proud to be recognized as a SRICTian wherever I go.

My heartfelt thanks to the management and the entire SRICT fraternity for investing in my future. To current and future SRICTians, cherish this opportunity, embrace challenges, and let SRICT's values guide you to greatness.

Dhruvil Babubhai Patel
2019 Batch

Alumni Feedback

Mahesh Varandkar
Chemical Technology

I had an incredible experience at “Shroff SR Rotary Institute of Chemical Technology”, and I'm immensely grateful for the education and opportunities it provided me. The college's courses was top- notch, and the professors were not only knowledgeable but also approachable and supportive.

The hands-on learning approach at truly “Shroff SR Rotary Institute of Chemical Technology” set it apart. I had the chance to participate in various real-world projects and internships, which significantly enriched my understanding of the Engineering world. The college's emphasis on practical skills, critical thinking, and problem- solving has been instrumental in my academics.

Additionally, the college's career services team was outstanding. They assisted me in securing a fantastic internship during my junior year, which eventually turned into a full- time job offer upon graduation at “Styrenix Performance Material Ltd.”. The alumni network also played a crucial role in my career growth, as I connected with several successful graduates who generously offered mentorship and guidance.

Campus life at Shroff SR Rotary Institute of Chemical Technology was vibrant and full of opportunities. The facilities were modern and well- maintained, and the wide range of extracurricular activities and clubs allowed me to explore my interests beyond academics.

I appreciated the college's commitment to creating an inclusive environment where everyone felt valued and respected. If I were to offer one suggestion for improvement, it would be to enhance mental health support services.

Overall, my time at college was transformative. I not only gained a solid education but also developed as an individual. The college provided me with the knowledge, skills, and network necessary to thrive in my career, and I would highly recommend Shroff SR Rotary Institute of Chemical Technology to anyone seeking a well-rounded and fulfilling college experience.

Alumni Feedback

Makwana Pratik
M.sc Organic Chemistry

Taking the right decision at the right time is always challenging. I faced this challenging situation when I joined M.Sc at UPL University of Sustainable Technology. But frankly, each and every moment at UPLUST remembers me that I made the right choice. Where I reached today is only because of the support, care, love, guidance and teaching gave my teachers and all other faculties in UPLUST. UPL University of Sustainable Technology is best in academic, sports, techfests, exhibitions, curricular activities and NSS activities. And also a well-defined SSIP cell is working at UPLUST capable of creating entrepreneurs for future generation. When come to my SRICT-ISR department, I feel grateful, when I remember the efforts each teacher taken to make us highly professionals. That's why I'm here today. Of course, the signatures got me from UPLUST will reach me more heights...and I feel proud that I "made the right decision at the right time"!!!
